Bookings

Finding a pro shouldn't feel like a gamble.

Two calm ways to get help, instead of one stressful guessing game.

THE FRUSTRATION

Hours on the phone, no real answers

Homeowners spend hours calling around for a plumber or electrician. Quotes are vague, arrival times are unreliable, and a burst pipe can't wait for a callback next week.

THE FIXIT WAY

One app, two calm paths

Scheduled: browse trusted pros by trade, see transparent pricing, and pick a day that works.

Urgent: see who's available right now and book in one tap — help arrives in about 30 minutes.

• Plumbing

• Electrical

• Cleaning

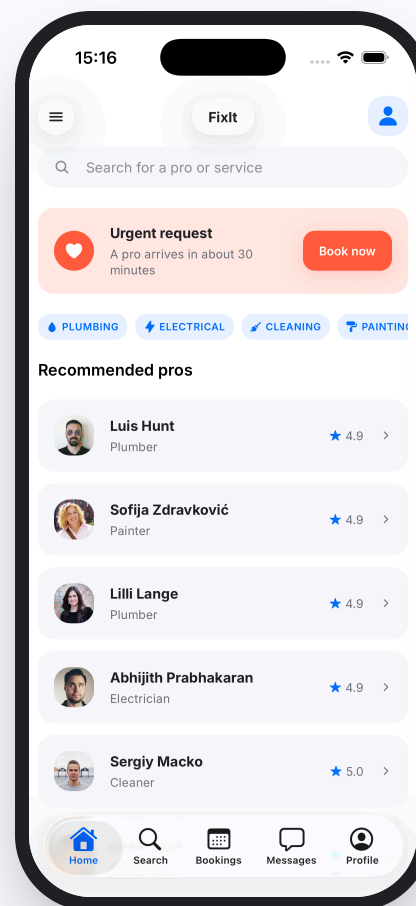

• Painting

• Carpentry

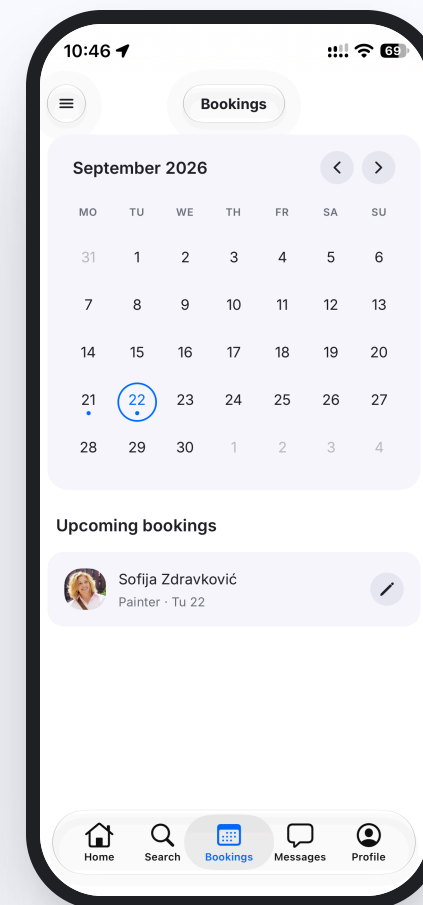

• Gardening

Find the right pro, then lock in a date.

- **Browse by trade** — six core categories, each with real ratings and pricing up front.
- **See the whole month** — booked days are marked right on the calendar, no guessing.
- **Change your mind freely** — reschedule any booking with one tap, checked against real availability.

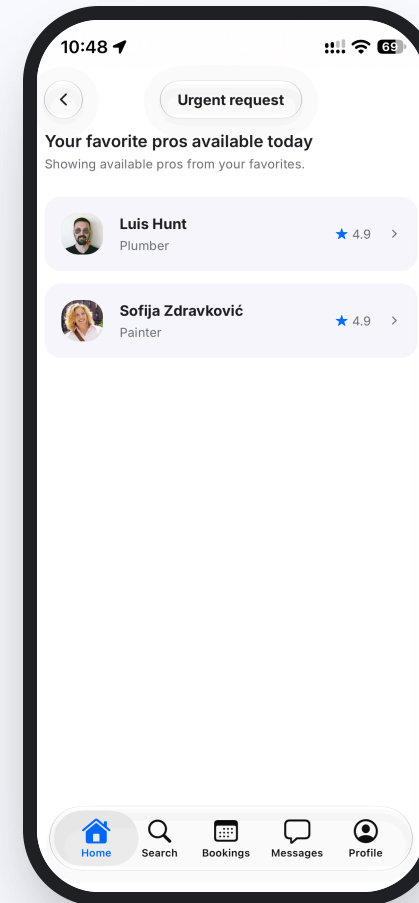

Recommended pros

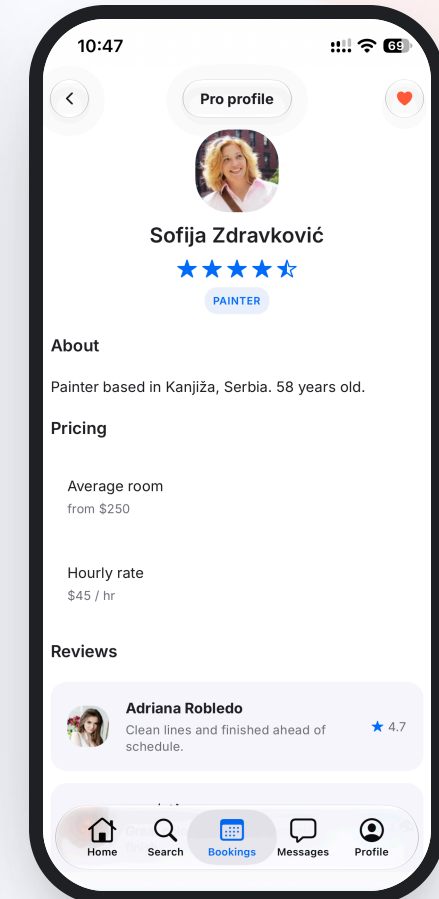

Month calendar

When it can't wait, neither do we.

- **One tap to dispatch** — see every pro free today and book instantly, no forms.
- **Your trusted pros first** — favorite the ones you've used before, and urgent requests check them first.
- **Arrives in about 30 minutes** — a real fallback for the moment a scheduled visit isn't fast enough.

Favorite pros, available today

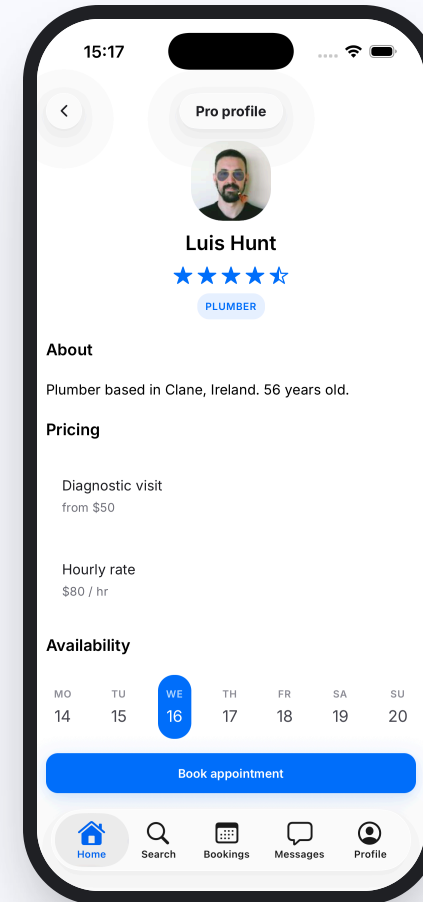

Save a favorite

Urgent & Favorites

Know who's coming, before they arrive.

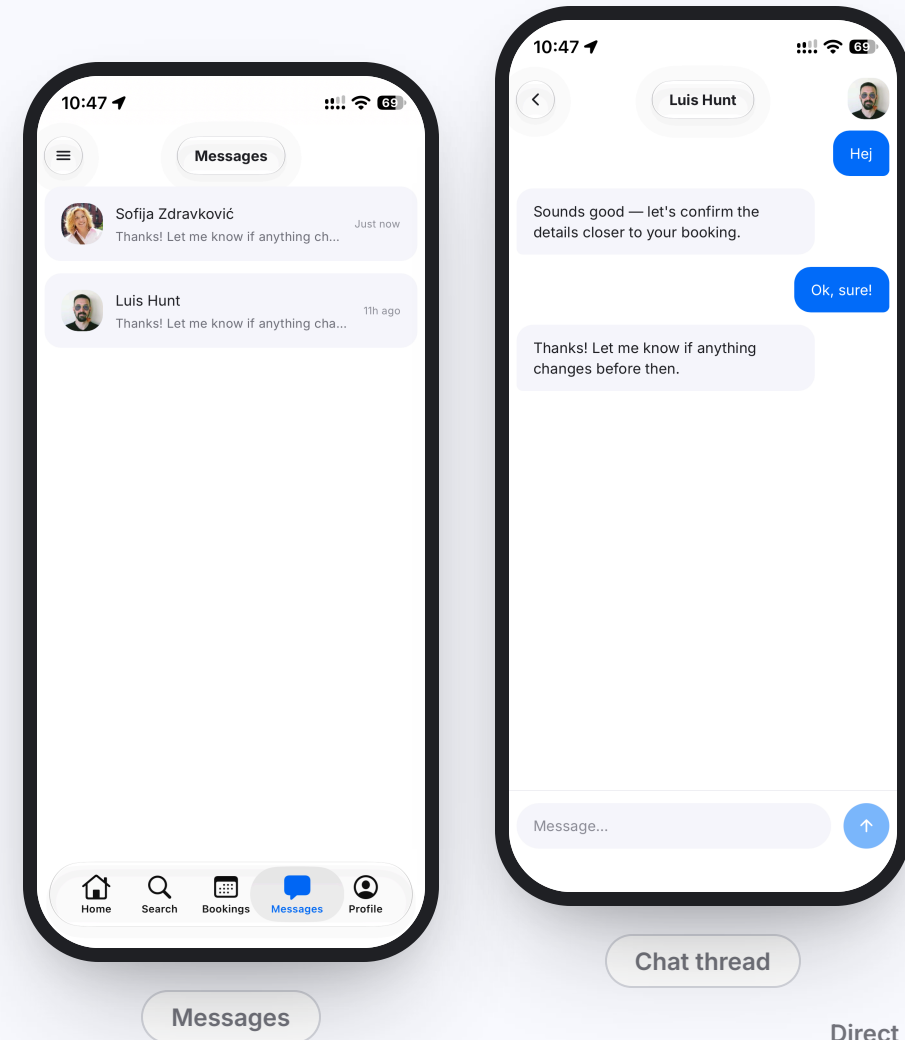

- **Real reviews, real ratings** — every pro's profile shows honest feedback from past customers.
- **Pricing up front** — flat rates and hourly quotes, visible before you ever book.
- **Save for later** — one tap on the heart keeps a great pro close for next time.

Pro profile & reviews

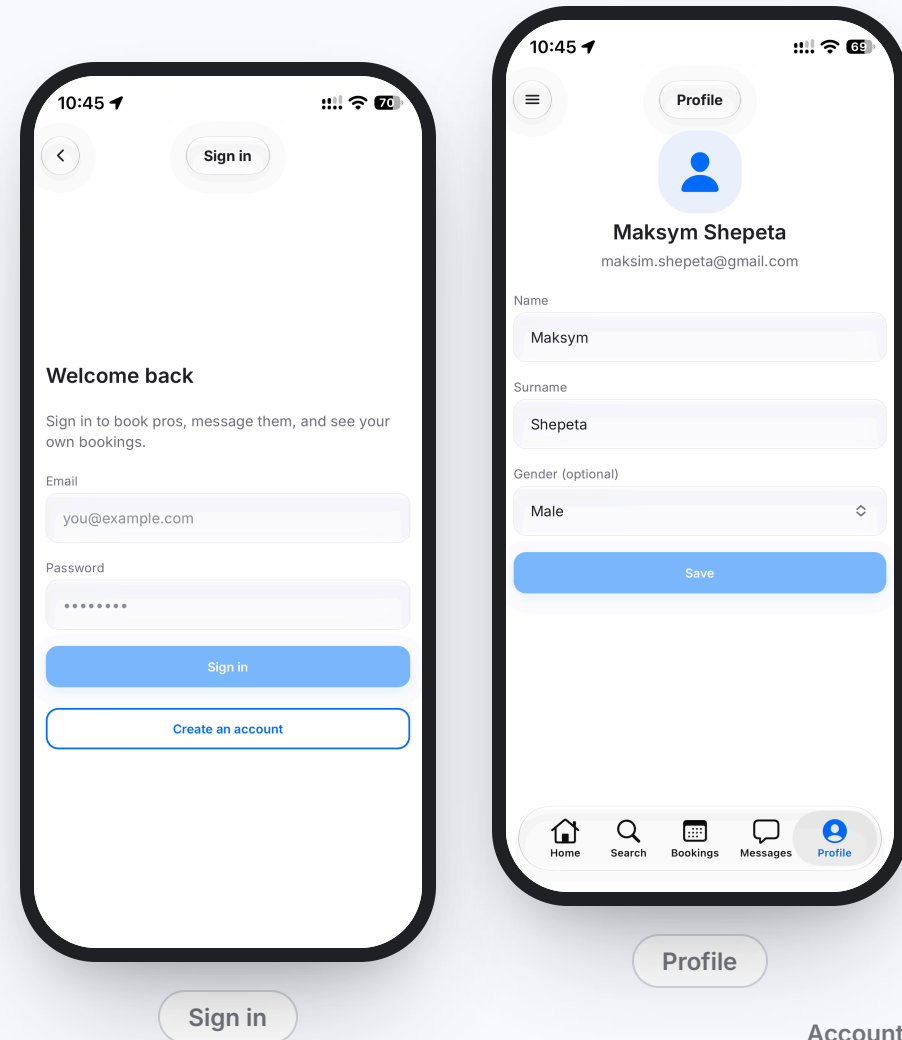

A direct line to your pro.

- **Stay in the app** — a private 1:1 thread for every booking, no phone numbers exchanged.
- **Confirm the details** — clarify arrival time, access, or scope before the visit.
- **Built for typing** — the keyboard never covers what you're reading or writing.

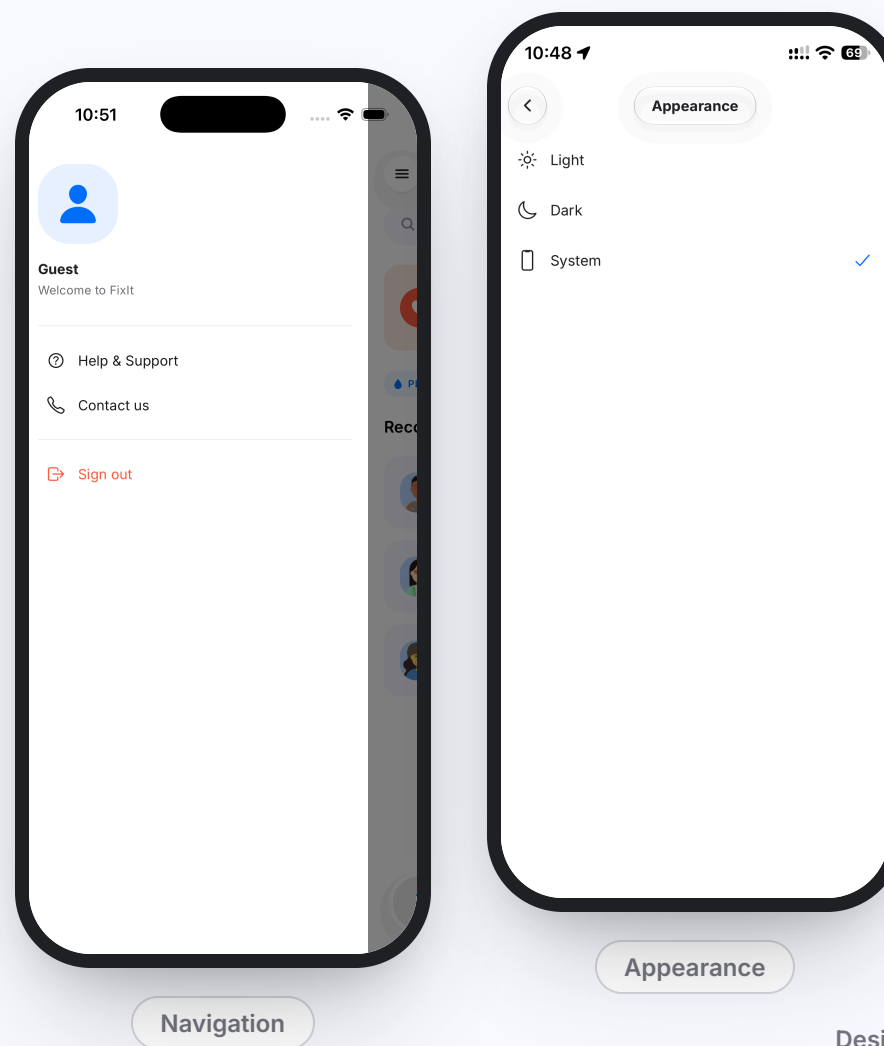

Sign in once. Stay protected everywhere.

- **Quick sign-up** — an email and a password is all it takes to start booking.
- **Hardware-level security** — your session is kept in your phone's secure vault (Keychain / Keystore), not a plain file.
- **One home for your details** — name, and preferences, all editable from a single profile screen.

Native by feel, not just by name.

- **Liquid Glass surfaces** — translucent, light-catching chrome that feels at home on modern iOS.
- **Fluid, native motion** — smooth transitions and gesture-friendly navigation throughout.
- **Light, Dark, or System** — the whole app adapts instantly to your preferred appearance.

FIXIT · MVP

Home services, made simple.

Discovery, scheduling, urgent dispatch, and direct messaging —
one calm product for getting home services done, on your
terms.
